About Us

Comprehensive Cancer Control (CCC) is a collaborative process through which a community pools resources to reduce the burden of cancer; resulting in reduced cancer risk, earlier detection of cancer, better treatment and improved quality of life.

The CCC National Partnership (“National Partnership”) consists of 19 leading national cancer organizations that come together to utilize their combined strengths and resources to support and advance the work of CCC coalitions. Two strategic goals guide the work of the National Partnership: to coordinate national CCC efforts and to facilitate and provide support to CCC coalitions. Learn more about the National Partnership by visiting cccnationalpartners.org
