

# ACTION FOR PSE CHANGE WORKSHEET

Step 6: Implement - Take Action

Use this worksheet as you consider how to carry out your PSE change activities.

**Have you done due diligence to prepare to implement your goals and objectives? Consider the following:**

- Have you developed a detailed PSE agenda and action plan detailing all that needs to take place to meet your objectives?
- Has enough awareness-raising taken place among stakeholders about the issue and the need for PSE change?
- Are stakeholders committed and engaged? - If yes, this will help ensure success
- Are partners committed to maximizing what they can bring to the project?
- Have sufficient resources been established to ensure successful implementation and sustainability of the PSE change effort?

**As you prepare to carry out your planned activities, what is your overall vision for success? Consider the following:**

- What are some potential short-term successes and what do they mean for the overall PSE change process?
- What are some potential long-term successes and what do they mean for the overall PSE change process?
- How will you determine if additional resources are necessary to sustain change?
- How will you continuously engage stakeholders and keep momentum going?
- How will you adapt to a changing environment?
- What would it look like if your efforts were not successful?
