GWU Flow Cytometry Core
For Your Safety

Cell Analysis

Transport of Samples
• BSL-2 samples should be in a secondary container with appropriate biohazard label

PPE
• All appropriate PPE should be worn at all times
  This includes closed toe shoes, gloves, and a lab coat

Decontamination
• All surfaces should be cleaned with 70% ethanol or 10% bleach and water after your appointment
• The keyboard and mouse are washable and should be decontaminated after your appointment

Waste Management
• 250mL of 10% bleach should be added to waste container after every disposal
• Sample tubes should be discarded in red biosafety boxes
