Focus on practical ways to integrate spirituality and compassion into healthcare

7th ANNUAL SPIRITUALITY AND HEALTH SUMMER INSTITUTE
July 8 – 11, 2015

“The ‘hands-on’ practice of each of the speakers was evidenced by the stories that were embedded in their presentations.”

-program participant

• Discuss evidence for spiritual care and compassionate presence, the tools to bring spirituality to the forefront of clinical care, and the roles of members of the interdisciplinary team.

• Participate in experiential learning, including large- and small-group case-based discussions and treatment/care plan development by interdisciplinary teams with standardized patients.

“I had a wonderful time listening to the presentations, meeting participants, and sharing with the group... It was really a tremendous opportunity for me.”

-program presenter

Learn with a diverse group of professionals.
Speakers include leaders in spiritual care, professionalism, and compassion:
