

MD Program for International Students

The MD Program for International Students (MD) was developed by the Office of International Medicine Programs (IMP), School of Medicine and Health Sciences (SMHS) at the George Washington University (GW) in response to the great international demand for graduates of U.S. medical schools. The goals of this four-year program

are to provide international students with a superb medical education, and to prepare them to return to their home country to practice medicine while advancing the mission of GW SMHS to improve the health and well-being of local, national, and global communities.

Program Description

The MD Program for International Students is designed for international students who have completed a bachelor's degree, including the required pre-medical coursework, at an accredited U.S. or Canadian college or university prior to matriculation at SMHS. Accepted students must meet all requirements for admission and same academic standards as students offered admission to the regular MD Program. International students must maintain full time enrollment status throughout the entire program.

Curriculum

The curriculum of the MD Program is designed to provide a medical education that prepares graduates comprehensively for residency training, provides them the experience on which to base their career selection, and prepares them for professional lives of continuous learning. Key features include: increased incorporation of active learning in place of traditional large-class lectures; enhanced professional development of students; integration of material to enhance learning and retention; added independent study time; additional focus on topics such as public health and clinical reasoning; each incoming first-year student receives an iPad; clinical clerkships begin in spring of second year; multiple opportunities for students to explore career options in the full spectrum of medical specialties; and unique only-in-Washington, D.C. educational experiences. All students are required to take and pass Step I of the United States Medical Licensing Examination (USMLE) before proceeding to year III, and take and pass Step II (CS & CK) before they graduate and start their residency training programs.

MD Program for International Students

Mentoring

International students in the MD Program are required to attend a monthly seminar and a monthly meeting. These required meetings will introduce students to their peers in the program, to the medical school community, and provide support for academic and extracurricular concerns. Meeting attendance is a part of the overall progress report of the student.

Services Provided to International Students by IMP

- Introduce students to GW and to familiarize them with IMP's role through a special orientation
- Assist in the cultural adjustment process by providing a buddy system with other international medical students and hold special meetings with students who need greater support.
- Advise students who may wish to discuss personal and family issues.
- Provide annual written progress reports to the students' sponsors.
- Monthly evaluation meetings to provide guidance, encouragement, and support to students, including tutoring resources when needed.
- Pay for students to register for the United States Medical Licensing Examination (USMLE) Step I registration and cost associated with exam preparation courses.
- Invite students to special IMP social events.

Application Procedures - *Minimum Eligibility Requirements*

- Applicants must meet all stated requirements for application. In addition to academic requirements, successful applicants should also have evidence of attributes, experiences and academic achievement that signal their ability to be Physician Citizens.
- Applicants must not be U.S. citizens, Canadian citizens, or Permanent resident visa holders.
- F-1 visa status must be maintained throughout the period of matriculation in the program; if the visa status of a student changes at any time during his or her matriculation in the program, he or she will no longer be eligible for the program and will be dismissed.
- Applicants must have completed a bachelor's degree, including the required pre-medical coursework, at an accredited U.S. or Canadian college or university prior to matriculation. Applicants must have mastered written and spoken English; and have taken the Medical College Admissions Test (MCAT).

Applicants to this program must be sponsored financially by their Government Embassy or by a home country health institution and have employment contracts.

Admission Process

All international applicants must submit the required materials as follows:

- To the Office of Admissions, for application requirements please visit: <http://smhs.gwu.edu/academics/md/admissions/apply/reqs>.
- To IMP: a financial guarantee or a sponsorship letter from a home country medical or academic institution; a CV; AMCAS Application Number and a copy of the GW Secondary Application.
- Deadlines: The AMCAS Application is due by November 15th and the GW Secondary Application is due by December 15th.
