Do you have a baccalaureate degree and have been considering a graduate degree but don’t feel you have the time? GW offers several online Master’s degree programs that may interest you. Our programs are flexible and allow you to work while pursuing your degree.

ABOUT THE PROGRAM
GW offers the following Master of Science in Health Sciences (MSHS) programs.

- MSHS in Clinical Microbiology (clinical program) (36 credits)
- MSHS in Molecular Diagnostic Science (clinical or non-clinical program) (35 credits)
- MSHS in Medical Laboratory Sciences (non-clinical program) (36 credits)
- MSHS in Immunohematology and Biotechnology (non-clinical program) (35 credits)
- MSHS in Translational Microbiology (non-clinical program) (36 credits)

WHY GW?
- Your degree means something - Obtain degree from a highly reputable university
- Lower tuition rates for online programs compared to face-to-face graduate programs at GW
- 100% online (clinical programs: clinical rotations completed in your geographic location)

APPLICATION DEADLINES
- Spring Entry: November 15
- Summer Entry: April 15
- Fall Entry: July 15
Please refer to website for program specific admission requirements.

**MASTER OF SCIENCE IN HEALTH SCIENCES**

### Clinical Programs

**Clinical Microbiology**
- Ideal for: Applicants who wish to become certified in Clinical Microbiology.

**Molecular Diagnostics**
- Includes coursework to prepare students for careers in diagnostic microbiology laboratories, research institutions, public health laboratories, biotechnology firms, pharmaceutical companies or governmental agencies.

**Medical Laboratory Sciences**
- Designed to facilitate movement into leadership and supervisory positions in the clinical laboratory through leadership, research, and management courses.

**Immunohematology & Biotechnology**
- Prepares students with the theoretical knowledge and practical skills for transfusion medicine research positions within hospital labs or blood centers or to become supervisors or managers in a blood banking laboratory.

**Translational Microbiology**
- Provides a working knowledge of both basic and clinical aspects of infectious disease for positions in diagnostic clinical microbiology laboratories, public health microbiology laboratories, biotechnology companies, government agencies and research institutes.
