The GW Covid-19 Intelligence Unit supports the GW Covid-19 Incident Management Team to scan the scientific, technical and lay literature to provide a concise weekly update for use by GW's front-line clinicians, administrative and operational leaders. These are the themes of this week:
THEMES OF THE WEEK:

• Professional organizations and States are developing strategies for easing social distancing requirements. Until highly effective new methods of treatment and prevention of COVID-19 are discovered, public health experts recommend a mass investment in testing, contact tracing, outbreak containment, and careful easing of social distancing based on local realities.
• Epidemiological and clinical experiences from China, Italy, New York and other early-hit communities are being published to help clinicians diagnose and manage patients.
• Our understanding of pulmonary and vascular pathology in this disease is growing. This includes considerable concern about coagulation abnormalities seen in COVID-19 patients.
• NIH and other health professional organizations are publishing guidelines and recommendations for practice based on these experiences and expert opinion.
• Early results of research on the use of various therapeutics are being published. Most are not peer reviewed and few are controlled, so we must interpret them with great caution.
• The results of serologic testing must be interpreted cautiously given the current limits on the sensitivity and specificity of the tests, and the absence of knowledge about the level of protective immunity that may be conferred.

Join via WebEx: https://gwu.webex.com/gwu/onstage/g.php?MTID=eff078b27017c4f1bb6250408f1cf587e

2. We have heard from members of our community that they want to support our mission during this time of need. The GW COVID Response Fund was established to support the work of our faculty, staff, and students during this crisis.

Staying GWell

https://smhs.gwu.edu/wellness/resources/covid-19-wellness-resources

1. Resources to Maintain Wellness - From the GWell Center for Healthcare Professionals Wellness Toolkit

   Toolkit: How to Make WFH Work for You

   Maintain boundaries

   - Work volume may be picking up
   - Separation between professional and personal lives is key to avoid burnout at a time of high demand
   - Define hours and space within your home, as much as possible
   - If you have a partner, trade kid duty

   Use commute time intentionally

   - Physical activity

   Maintain social connection

Please find guidance from the GWell Center for Healthcare Professionals Wellness Toolkit. You can find the full toolkit here:

This email is intended to serve as a digest of all messaging for our clinical faculty, students, and staff. We will send this email at the close of business each day, as we are managing daily operations during the COVID-19 pandemic.

This content will also be available at www.COVID19GWHealth.com - please refer to that site often, as we will be posting updates on a regular basis.

If you have feedback, please feel free to send to SMHSNews@gwu.edu
