

## The Clinical and Translational Science Institute at Children's National (CTSI-CN) – a partnership with The George Washington University

The CTSI-CN is a network of researchers across Children's National Health System and The George Washington University that have teamed up to accelerate research, increase standards of research quality, and more efficiently translate research into improved clinical practice, health interventions, and human applications. Recognizing the challenges of conducting translational research, the CTSI-CN provides infrastructure, services, and resources to research teams at both institutions.

Take a look at our website: <https://ctsicn.org/>

Membership is **FREE** and gives you access to:

### Funding & Support

- ✓ Career development awards <https://ctsicn.org/funding/ctsi>
- ✓ Pilot research awards
- ✓ Mobile app development prize
- ✓ Research vouchers & Team Science awards
- ✓ Grants Enhancement Program <https://ctsicn.org/grantprehelp>

### Group Sessions & One-on-One Support

- ✓ Biostatistics, Epidemiology & Research Design
- ✓ Bioinformatics & Genomics
- ✓ Data Management & Data Analysis <https://sparc.ctsicn.org/>
- ✓ Recruitment & Retention Strategy
- ✓ Community Engagement

### Research Tools & Resources

- ✓ ResearchMatch <https://www.researchmatch.org/>  
(a national registry of potential study participants)
- ✓ REDCap access & training <https://ctsicn.org/redcap>  
(a secure web-based app for building & managing online surveys & databases)
- ✓ Seminars, Workshops, Events, Degree & Non-degree Training <https://ctsicn.org/events>
