

- 12:00** **Registration, Lunch, Poster Set-Up**
- 12:30-1:00 PM** **Welcome**
Barbara L. Bass, MD
Kimberly D. Russo, MBA, MS
Alison K. Hall, PhD
- 1:00- 1:45 PM** **Session I: Lightning Talks**
Matthew Colonnese, PhD
Circuit basis of activity maturation in normal and injured brains
William Gaillard, MD
Childhood epilepsy and brain structure
Anne Chiaramello, PhD
From concept to clinic: mitochondria in neurodegenerative disease
Jennifer Berkeley, PhD, MD
Neurocritical care research in a community setting
Sanjay Maggirwar, PhD
Monocytes in HIV Associated ND
Vsevolod Polotsky, MD:
Sleep-disordered breathing in obesity
- 1:50-2:10 PM** **Clinical Interests and Expertise**
Michael K. Rosner, MD
Overview of neurosurgery expertise and interest
Mohamad Koubeissi, MD
Multidisciplinary clinics and clinical trials in neurology
- 2:10-2:30 PM** **Break**
- 2:30-3:15 PM** **Session II: Lightning Talks**
John Bethea, PhD
Neural injury, neuroinflammation and repair
Hui Lu, PhD
Circuit dysfunction in motor function and affect
Paul Marvar, PhD
Translational research opportunities in neuropsychiatric diseases
Nobuyuki Ishibashi, MD
Neurological impairment in congenital heart disease
David Mendelowitz, PhD
Animal models to disrupt autonomic regulation of cardiac function
Christina Prather, MD
Dementia and aging
- 3:20-4:00 PM** **Next Steps**
- What steps can we use to build connections between researchers?
 - In what areas should we collaboratively build brain research?
 - What structure will foster our synergistic growth and success?
- 4:00-5:30 PM** **Networking Reception and Posters**
