

ONLINE COURSE

Cancer Center

Cancer Survivorship E-Learning Series for Primary Care Providers

A no-cost online training from
the George Washington University (GW)
Cancer Center's Online Academy

OVERVIEW

Through a series of self-paced modules, the training walks participants through:

- Survivorship care and the role of primary care providers
- Late and long-term side effects of cancer and its treatments
- Prevention in cancer survivorship
- A team approach to cancer survivorship care coordination
- Cancer recovery and rehabilitation
- Clinical care guidelines for prostate, colorectal, breast, head and neck cancer survivors

LEARNING OBJECTIVES

Participants will be able to:

- Identify existing cancer survivorship care guidelines and current national efforts related to survivorship care
- Describe the role of primary care providers to screen for distress and provide follow-up care
- Identify the role of the oncologist and primary care provider in co-managing follow-up care
- Describe guideline-supported recommendations for secondary cancer prevention to cancer survivors

AUDIENCE

Primary care providers and others who provide follow-up care to cancer survivors can all benefit from this training. Visit our website to learn more about continuing education credits offered.

HOW TO ENROLL
